

I.L. Laboratorio Familiar N.V celebrates 20 years of serving Aruba

What started as a one-woman operation twenty years ago was a cause for celebration at the Surfside Marina on Saturday night. When Lic Irene van der Linde opened her testing lab “I.L. Laboratorio Familiar “ she had a dream to see her service expand and grow, and with determination and hard work she made it happen, achieving an “N.V.” in 1988, and over the years opening several branches to serve the public and business sectors.

Irene’s labs guarantee speedy twenty-four hour results, and this excellent and complete service has brought not only individuals, but also several businesses that regularly test their employees to her door. Aside from the main facility on the de la Sallestraat 72, I.L. Laboratorio Familiar has five other convenient locations for the collection of specimens, and provides home service for those unable to leave their homes, at no additional cost.

This dedication to quality and service has given Irene van der Linde a well-deserved success, and she shared it with her employee and loyal customers by throwing a gala anniversary bash at the Surfside Marina that brought hundreds of well-wishers. A touching video presentation with testimonials by a devoted staff was followed by an evening of joyous celebration under the stars.
